

# **The Trial of the Lesson which Aims at Development of Creativity: Training of the Problem Solving Capability**

**SUZUKI Mitsugu**

## **Abstract**

This research reports on the practical training of problem solving capability as a trial lesson which aims at development of creativity. This lesson performs five creation process's as one cycle.

(1) The whereabouts in question is grasped (2) The plan of problem solving is formed  
(3) Required knowledge is collected (4) Problem solving is aimed at (5) A result is evaluated.

The measure for the subject of problem solving needs a creative process. By repeating these five process's, problem solving capability is raised and it leads to development of creativity.
